Brand Statement

Driven by a thirst for adventure, I embarked on a journey to NYC over a decade ago, determined to experience life to the fullest. With a foundation in loyalty and hard work, my passion for software engineering and travel converge to create innovative solutions that transcend borders. Fueled by unwavering dedication and insatiable curiosity, I constantly push boundaries, leaving a mark on the world beyond software engineering.

TOOLS

HTML, CSS, JavaScript, MongoDB, Express, React, Node.js, SQL, Django, Python ,Git ,Docker

RELEVANT EXPERIENCE

Software Engineering Immersive Apprenticeship | General Assembly | New York, NY | April 2023 - July 2023

Successfully completed 480+ hours of expert-led instruction in React, CSS, HTML, MongoDB, Express and hands-on learning of JavaScript fundamentals and Python fundamentals. Developed projects, including:

- **Memory-Card-Game:** A simple game where you match two cards [Created the whole project myself, HTML, CSS and JavaScript] Play Game [Here](#)
- **Full CRUD Application:** Application that uses a 3rd party API and I can have a full CRUD in my front-end as well as back-end [Developed a full CRUD application that integrated a 3rd party API, allowing users to perform Create, Read, Update, and Delete operations on data through the application's front-end and back-end. Conducted comprehensive research and analysis to identify the most suitable 3rd party API for integration into the application. Designed and implemented a user-friendly interface using front-end technologies, enabling seamless interaction with the API for CRUD operations. Developed secure and efficient back-end endpoints to handle data manipulation, integrating the chosen 3rd party API. Conducted extensive testing and debugging to ensure the application's functionality, stability, and seamless integration with the 3rd party API.] Link to the CRUD [Here](#)
- **MangaVerse:** In this team project, I played a pivotal role in setting up the back-end structure using JavaScript and MongoDB. I took charge of implementing authentication and skillfully set up the necessary routes to facilitate seamless integration with the 3rd party API. As a result, we were able to achieve Full CRUD functionality on both the front-end and back-end, ensuring a robust and user-friendly application. [Here](#)
- **IdentityLock:** As team lead and senior developer, I led the creation of IdentityLock, an innovative app utilizing React.js for seamless front-end interactions and SQL, Python, and Django for robust back-end data management. NFTs, blockchain, and AI FinTech Guru provided unique user identities. Private keys ensured secure transactions, while Web3, Axios, Solidity, Ethers, and Cors facilitated decentralized NFT and asset storage. Experience the future of digital identity! [Here](#)

EXPERIENCE

General Manager | Bar 135 | New York | April 2022–April 2023

- Built the whole system from the ground up
- Created a full cocktail menu based on the customers' needs and the inventory that we had, carefully selecting and crafting a diverse range of delicious cocktails to cater to their preferences and ensure an unforgettable drinking experience.
- Recruited, hired, and trained a skilled team of bartenders, servers, and support staff, ensuring a high level of service and customer satisfaction.
